

Heakyung Kim, MD

Heakyung Kim, MD serves as Vice Chair and A. David Gurewitsch Professor of Rehabilitation Medicine of Columbia University Medical Center and Weill Cornell Medical Center, Director of Pediatric PM&R at Morgan Stanley Children's Hospital and at Blythedale Children's Hospital, New York, USA. She is founding director of Pediatric Rehabilitation Medicine fellowship program at New York Presbyterian Hospital. She received her M.D. from the Medical School of Ewha Womans University in Seoul, South Korea and was trained at the Department of Rehabilitation Medicine of Yonsei University, School of Medicine in Seoul, South Korea and at the Department of Rehabilitation of UMDNJ-New Jersey Medical School/Kessler Institute for Rehabilitation. She is a board certified physiatrist in the USA and South Korea and holds subspecialty boards in Pediatric Rehabilitation Medicine and Brain Injury Medicine. She specializes in single event multilevel chemoneurolysis (SEMLC) with botulinum toxin and alcohol, botulinum toxin injections to salivary glands, and pain management in children with cerebral palsy and other neuromuscular disorders. Her research interests focus on spasticity management, efficacy of botulinum toxin on salivary glands, oxygen consumption in people with spasticity with botulinum toxin and robotic therapy for weak limbs in children with cerebral palsy. Dr. Kim has been recognized as one of "America's Top Doctors" by New York Magazine and Castle Connolly as well as a "Super Doctor" by New York Times Magazine. She is nationally and internationally regarded as an expert in spasticity management and drooling management with botulinum toxin.
