

Frederic Meunier, PhD

Professor Frederic Meunier obtained his Masters degree in Neurophysiology at the Paris XI University, France in 1992 and completed his Ph.D in Neurobiology at the CNRS in Gif-sur-Yvette, France in 1996. He was the recipient of a European Biotechnology Fellowship and went on to postgraduate work at the Department of Biochemistry at Imperial College (1997-1999) and at Cancer Research UK (2000-2002) in London, UK. After a short sabbatical at the LMB-MRC in Cambridge (UK), he became a group leader at the School of Biomedical Sciences at the University of Queensland (Australia) in 2003. He joined the Queensland Brain Institute of the University of Queensland in 2007 and obtained an NHMRC senior research fellowship in 2009 renewed in 2014 with promotion. He became Professor in 2014 at the Queensland Brain Institute and is currently part of the Centre for Ageing Dementia Research.
