

Michael Munin, MD

Michael C. Munin, MD, is a professor and vice chair for Strategic Planning and Program Development in the Department of Physical Medicine and Rehabilitation at the University of Pittsburgh School of Medicine. He holds secondary appointments as professor of Rehabilitation Science and Technology at Pitt's School of Health and Rehabilitation Sciences and the Department of Otolaryngology.

Dr. Munin is the director of EMG services for the department at UPMC Presbyterian and Shadyside hospitals. He also directs the Spasticity Evaluation and Treatment Center and prosthetic rehabilitation clinic. Dr. Munin is the senior editor for department publications: Rehab Progress Newsletter and UPMC Rehab Grand Rounds.

Dr. Munin is involved in DARPA and industry funded research. He has authored numerous articles for scientific and clinical journals. Dr. Munin is frequently invited to speak at peer seminars and lectureships related to his research and conducts national workshops related to treatments for spasticity and the use of EMG as a diagnostic tool.
