

Christopher P. Smith, M.D., M.B.A., M.S.S.

Christopher P. Smith, M.D., M.B.A., M.S.S., Associate Professor, is a Board-certified urologist specializing in male and female urinary incontinence and voiding dysfunction. Dr. Smith is an international expert on the basic and clinical aspects of botulinum toxin use within urology. He has used botulinum toxin clinically for over a decade. In addition to his extensive involvement in basic science research, Dr. Smith is a principal investigator on several clinical trials examining the effects of botulinum toxin to treat patients with overactive bladder and benign prostatic hyperplasia (BPH). Dr. Smith is also currently a Colonel in United States Army Reserve Corps and has been deployed three times in support of Operation Enduring Freedom (OEF).
