

Steven Yoelin, MD

Dr. Yoelin completed his undergraduate work at the University of California, Davis, where he graduated magna cum laude with a Bachelor of Science degree.

He attained his medical degree from the University of California, Irvine, where he received numerous awards for his academic efforts and also his research efforts.

He is a board certified ophthalmologist, and he currently practices in Newport Beach, California. In addition, he enjoys working in the clinical field of endeavor, as well as in the research field of endeavor. For the past eight years, Dr. Yoelin has developed a keen interest in the use of neurotoxins, dermal fillers and collagen stimulators. In that regard, he has long been very much interested in, and also heavily involved in, the very important role that such injectables are now playing in the facial aesthetics field of endeavor. Moreover, he definitely will continue to focus on the facial aesthetics field of endeavor in the future.

Dr. Yoelin speaks at numerous professional events and conferences throughout the country. For example, he speaks annually at every major ophthalmic meeting regarding all FDA approved facial injectables. In addition, he continues to actively participate in various FDA and investigator initiated clinical trials regarding a variety of facial aesthetics related issues. Dr. Yoelin has been the lead investigator regarding several pilot studies and trials that in one instance led to an entirely new FDA approved aesthetic product at the end of 2008.

Dr. Yoelin thoroughly enjoys teaching other physicians how to master the administering of all of the various injectables related products, as well as the proper step-by-step approach and methodology needed to develop, maintain, and “grow” a very successful aesthetic practice in various kinds of economic periods, including how a physician can make a great success of a facial aesthetics practice in any and all economic periods, including in an extremely challenging and even adverse economic period.
